Walk Lightly On The Earth

Words and Music
Pam Donkin and Greta Pedersen

Walk lightly on the earth my friend, walk lightly on the earth.
Take care with every step my friend, walk lightly on the earth.

1. People can do wondrous things, with dreams that touch the skies.
   Habitats are vanishing, endangering the lives of the hump-back whale.

2. Habitats are vanishing, endangering the lives of the hump-back whale,
   Symphonies, discoveries, enriching all our lives.

Yet the people can't bring back the eagle soaring high.
If the children of our children will know the wonders of these.

It's a fragile balance in our work and in our play, and as we do,
let us walk must remember to walk
